

# BP Rail Solutions M18.080D

The wagon series M18.080D is designed to transport liquid goods RID, class 3, 6, and 9. The products can be heated up to +190°C to ensure no discharge residues. Lower valve, DN 100, heated; T-piece, DN 100, insulated, can be heated separately. It can be filled through the bottom discharge. Optionally, a top discharge can be installed. By adding a riser pipe, it can be converted into a chemical tank wagon, e.g. to carry phenol, benzene, and vinyl acetate monomer. Uncomplicated and inexpensive tank cleaning thanks to the externally mounted heating system.

<b>Nominal volume:</b>	Approx. 80 m <sup>3</sup>
<b>Tare weight:</b>	26 t
<b>Axle load:</b>	22,5 t
<b>Total length:</b>	16240 mm
<b>Clearance - outer wheelsets:</b>	11200 mm
<b>Design temperature:</b>	-20/+200°C
